- Tailwind
- HTML & CSS

EXPERIENCE

Full-stack Developer at Tres Pi Medios / Stanley Black & Decker | Express.js, POSTGRESQL, REACT, PostgreSQL, TYPESCRIPT, GIT, DOCKER, AZURE, AWS, GCP, MONGODB, VITE
Jul 2024 – Present | Remote

- Built an application for managing tool loans and repairs for Stanley Black & Decker in Italy, cutting task time by 50%
- Developed an Azure Cloud Function to automate integration of a generative AI model, enabling automated response generation for Stanley Black & Decker's customers on the Zendesk platform in the U.S.
- Developed features for chatbots to assist customers in the U.S. and Canada
- Implemented features for a service delivering real-time data to a Power BI dashboard, enhancing monitoring and reporting capabilities.
- Integrated internationalization for Stanley Black & Decker's web applications in Italy and the Middle East, supporting both Italian and English. This involved implementing i18n and i18next libraries across the back-end and front-end to ensure seamless multilingual support.

Full-stack Developer Intern at SuperGIROS | Java, JavaScript, Spring Boot, Spring Security, SQL, Angular, Express.js, React.js, Docker
Aug 2023 - Jul 2024 | Cucuta, Colombia (On-site)

- Developed new internal solutions, increasing operational efficiency by 30%.
- Optimized existing software, reducing processing times by 45%.
- Implemented a microservices system with Spring Boot and Docker, improving software scalability.
- Integrated new features into the software, increasing user satisfaction by current users by 70%.
- Migrated company projects from old Angular versions to Angular 16 and 17.
- Managed SQL databases such as Oracle SQL and MySQL.
- Improved the loading speed of web and mobile applications by 50%, reducing abandonment rates by 20%.

Full-stack Developer at Fundación Literaria León Bienvenido Weffer | Python, FastAPI, POSTGRESQL, REACT, DOCKER
Nov 2023 - Jan 2024 | Remote

- Developed Full Stack system, reducing response time by 20% and improving performance by 15%.
- I used MVC model, reducing maintenance efforts by 30% and improving scalability by 25%.
- I integrated authentication mechanisms, improving security with fewer incidents of unauthorized access.
- I designed and implemented a C.R.U.D for the management of books, inventory, clients and a loan system, improving efficiency by 75% in administrative tasks.
